

## **PREGNANCY**

### **Pregnancy dream**

2 weeks before & 2 weeks after the birth

Photos will be taken at two times; once during the pregnancy and as soon as the baby is on the world. A pleasant and personal posture will be elaborated with the pregnant woman (possibly with partner). Focus: Between fiction (conceptions of the baby) and reality (in such a way it actually looks).

### **Belly Splendour**

Highlight of my pregnancy

The most perfect beautiful belly form (middle/end of 9. month) is consciously figurative caught respectively photographed. A harmonious instant of the solidarity between becoming mother and unborn baby becomes noticeable.

### **9 months – the development**

Photos will be taken once per month during 9 to 10 months. The pregnant woman (possibly with partner) always poses in the same posture at the same place. The last photo shows also the newborn child beside the proud mummy (and dad).

### **Baby 1 year**

The baby will be photographed at the actual age of one year of his existence (nine months in the belly and three months on the world). In the sense of the natural birthday; simply celebrate it once differently.

## RELATIONSHIPS

### **Pair whisper**

Togetherness, pairs will be photographed in their unmistakable uniqueness. You can choose from which side of you do you want to show. May it be intimate solidarity, playful or erotic? The pair shows itself and new develops in the area.

### **Other(s)**

The desire not to be photographed alone is in the centre of attention. A photo together with the family, with children, with one's dog or another living being; a completely normal photo or perhaps also not?

## MY PORTRAIT

### **That's me**

How do I realize myself I and where do I stand? The personality, the own truth is the centre of the photography. Together we will work out your individual special portrait. The personal portrait is more than only photography.

## **FINE NUDE ACT**

### **Act and/or art photos**

Intimacy, individuality, and boundlessness of the own being.
